

QUALITY AND ENVIRONMENT MANAGEMENT SYSTEM POLICY

JISO ILUMINACIÓN, S.L. is a Company dedicated to develop, manufacture and commercialize indoor and outdoor luminaires for different spaces as a residential areas, commercial areas, public areas, etc.

The management of JISO ILUMINACIÓN, SL. undertakes, through this policy, to comply with the following two fundamental principles:

- 1º. Comply with the current and future requirements of customers, the legal requirements applicable to the products included under our activity and any other requirement that The Management considers to subscribe related to the environment.
- 2º. Continue improvement of the efficacy of the quality and environment management system

In order to ensure the compliance of both principles, the Management establish the following policy:

- Our customer orientation forces us to satisfy their current and future needs.
- We must leadership the change, offering to our staff the possibility to be involved in the achievement of the targets and in the prevention of the pollution.
- Focus the improvement decision making, in data analysis and corrective actions.
- Promote the innovation in our process, the use of new technologies and the use of good practises, in order to improve our products and minimize the environmental impacts.
- Develop and apply permanent actions to train, sensitize and motivate, the staff, regarding the product improvement and the environmental protection.
- Maintain communication channels with our suppliers and concerned parties, in order to inform and collaborate in the fulfilment, and improvement, of the requirements of our products as well as in the environmental actions.
- Integrate environmental factors in the purchase decision making and in the development of our products.
- Consider the technological and environmental capacity requirements as one of the requirements for the evaluation and selection of our suppliers.
- Reduce, systematically, the wastes by recycling internally when possible.
- Use effectively the natural resources, raw materials and energy.
- Ensure the compliance, by us and by our suppliers, of our Social Policy

All of that needs the effort and dedication of everybody, thanks for your collaboration, to reach it.
